

The Ultimate Electric Cargo Trike

Always have the wind behind you

Hatch open, hatch closed!

Our must have feature!

Children and dogs keep getting heavier. Thanks to the front hatch, loading and unloading is easier than ever, much easier than a car.

Bafang mid-drive

Comfortable and safe

Electric bikes can be fitted with two types of motor, a mid-drive (bottom-bracket) type or a front wheel hub type. So why a mid-drive on the soci.bike? A mid-drive system reacts quicker to your pedaling input, leading to a more natural feel to your bike. The motor only gives you assistance when you need it, it stops when you stop. The result is a more comfortable and safe riding experience.

NuVinci Harmony automatic gearbox

Shifting is so 1996...

Each soci.bike is equipped with a NuVinci Harmony automatic gearbox as standard. If you are driving in traffic with a heavy load, or you want to go fast on the flat, the soci.bike has got you covered! You can enjoy the weather, ride with you children with one less thing to worry about.

Tektro hydraulic disk brakes

Hopfully they don't loose their breakfast

Sometimes there aren't enough minutes in the day and you need to go fast. Luckily the soci.bike is fitted with hydraulic disk brakes, a technology originally developed for Formula 1, so you can stop quickly and precisely. You can take comfort in the knowledge that you will be able to react quickly to the unexpected.

Specially developed mudguards

Its always good to look after your fingers

One of the nicest things about children is they are always curious, what happens if I put my fingers in the spokes? For example. This is why we specifically developed the soci.bike mudguards to protect you from spray while also protecting the curious ones from the wheels.

Robust luggage rack

Friends come too

Whether you are carrying children or your heavy shopping, the soci.bike is up to the task. The soci.bike is one of the few cargo bikes with a high capacity luggage rack. Perfect for an extra child seat or some pannier bags. You really can carry everything.

Specificaties

Dimensions Bike (lxbxh)	212,5 x 80 x 120 cm
